

DANIP: ISG Data Management & Reporting System

USI System Update Notice – April 2026

Overview

This update outlines key enhancements made to the DANIP platform specifically for the USI (Universal Salt Iodization) program. These updates aim to improve data quality, reporting workflows, and user experience.

Key Updates for USI

- 1 Introduction of system notification upon login for important updates.
- 2 Enhanced validation rules to ensure accuracy of USI indicators.
- 3 Improved user interface for better usability across reporting forms.
- 4 Streamlined data entry and reporting processes for USI indicators.
- 5 Performance improvements for faster data processing and loading.

Changes to Reporting

USI reporting workflows have been refined to ensure consistency and accuracy. Users are advised to review entered data carefully before submission.

Important Notice

This is a test and validation environment. Data entered should not be used for official reporting purposes.
